

# Delivering Fast, Simplified Password Management with RoboForm Enterprise

RoboForm Enterprise is a full-featured, out-of-the-box password management solution that provides a secure, easy and cost-effective way to manage all of your employees' numerous passwords. It reduces their numerous logins to **one master password**, making your employees more productive while saving significant IT costs for your organization.

## Benefits

### Increased Employee Productivity & Satisfaction with a Single, Secure Login to All Applications

RoboForm Enterprise automatically logs users into the business applications they use every day. It reduces the time-consuming login process down to one click, eliminating employee distraction and frustration caused by forgotten passwords and allowing employees to focus on their jobs. Your users can be up and running quickly with little to no training required.

*One-click logins*

*Strong password protection*

*Same-day solution*

*More productive employees*

*Immediate ROI*

*"Using RoboForm Enterprise, we had a 20% decrease in support requests last year,"*

*Tony Atkins, Client Service Analyst  
M Financial Group*

### Instant IT Savings, Reducing the Burden on Helpdesk Staff

The self-service nature of RoboForm Enterprise translates directly into instant relief for your IT and helpdesk staff since they are no longer disrupted by employees' numerous password reset requests. Your company can take advantage of stronger password management practices, while staying focused on more critical enterprise IT projects.

### Cost-Effective with Rapid ROI

RoboForm Enterprise is licensed per user at a reasonable price point (at a fraction of the cost of traditional Single Sign-On(SSO) Solutions) with volume discounts available. Using RoboForm Enterprise, your organization will realize significant savings and immediate ROI with more productive employees and with significant IT cost reduction by eliminating help desk calls to reset passwords. In many cases, this factor alone helps you quickly recover the low-cost, up-front investment in purchasing the software. Most companies experience a positive ROI in **less than three months** just from help desk savings!

### Immediate Results with Fast and Easy Roll Out, No Integration or Infrastructure Changes

RoboForm Enterprise offers a simplified implementation process so that the software can be up and running in minutes. Administrators have the flexibility to quickly customize and control password settings as needed. Unlike traditional SSO, RoboForm Enterprise does not require you to hire a team of consultants to plan and implement, nor integrate or make changes to your application infrastructure. It works with your existing applications automatically.

## Key Features

### Powerful Password Protection and Security

- Automatically 'learns' and 'remembers' employees' passwords,
  - Storing them in AES-encrypted 'Passcards' with a single, Master Password as a key.
  - Mitigating the risks of unsafe employee habits like writing down passwords, storing them in unprotected files, using the same password, or openly sharing passwords with others.
- Ensures stronger password management practices and policies without increasing IT costs.
- Automatically generates secure, randomized, complex passwords for use throughout the enterprise, without burdening employees.

### Secure, Distributed Architecture with No Single Point of Attack

- Encrypts and stores each employees' Passcards on individual clients, ensuring that no "keys to the kingdom" are available and vulnerable to compromise an enterprise's password storehouse.
- Ensures the Master Password is protected and known only to employee, keeping it confidential.

### Flexible, Enterprise-Wide Administration

- Automates installation for faster, non-disruptive, mass rollout across the enterprise.
- Lets you customize enterprise policies for password requirements including password length and complexity, password resets/expiration, white-listed or black-listed Web sites, etc.
- Lets you customize options and features available to users to show/hide functionality.

### Risk-Free Trial to 'Try-Before-You-Buy'

- Gives you 30-days to use the complete product, and not just a sub-set of features with the promise of full features after purchase.
- Lets you fully test the software with as many users as needed to be confident it meets your goals and objectives.

*Using RoboForm Enterprise, your employees no longer waste time manually logging into each business application, trying to remember their multitude of changing passwords or constantly contacting IT to reset forgotten passwords.*
