**SIBER SYSTEMS INTRODUCES GOODSYNC2GO, ENABLING USERS
TO USE GOODSYNC SYNCHRONIZATION UTILITY ON ANY PC**
*New Version of Top-Rated Synchronization/Backup Software Installs
On Any USB Flash Drive, Portable Hard Drive or other Portable Computing Device*

FAIRFAX, VA — (August 21st 2009) — Siber Systems, Inc., a company dedicated to providing world-class computing productivity software for enterprises and individuals, today announced the availability of GoodSync2Go, the completely portable version of Siber System's award-winning backup and synchronization product for personal computers. Able to be installed on any portable storage media or computing device, GoodSync2Go circumvents the issues with installing software on a host computer, allowing users to instantly backup or synchronize data between multiple sources and destinations.

GoodSync, which has garnered over two dozen awards, top ratings, reviews and recommendations from PC World, Computer Shopper, Network World and others, makes it easy and fast to backup and/or synchronize large amounts of information. Photos, music, videos, even entire hard drives—GoodSync supports dependable backup and/or synchronization between multiple computers and/or hard drives via USB cable, local networks and the Web.

GoodSync2Go further extends GoodSync's considerable value by enabling users to carry GoodSync with them wherever they go. Instead of having to install the software in a fixed location, users can now run the software from a USB flash drive, portable hard drive or other portable computing device.

“In the past it's been difficult to keep two non-connected computers in sync, especially in organizational or work environments where users don't have administrator rights, or where installing software on a host computer is prohibited,” said Bill Carey, Siber Systems VP of Marketing. “With more people using more than one computer nowadays, simple backup may not be enough. GoodSync2Go bridges that gap by allowing users to synchronize their information anywhere, on any PC where the information may reside.”

GoodSync2Go can not only synchronize a user's entire data collection, but also analyzes, filters and displays results of syncing operations, providing confidence that duplicates are avoided and only needed files are synced. Real-time action monitoring, an easy-to-understand tree-based interface, and automatic settings simplify GoodSync2Go's operation, adding to the user's peace of mind.

Pricing and Availability

Like the original GoodSync, Siber Systems' new GoodSync2Go backup and synchronization utility is FREE to try for 30 days, and will remain free for users with three or less backup/sync

jobs and 100 or fewer files per job. GoodSync2Go Pro, the professional version of the product, can be purchased for \$39.95 (USD), or just \$19.95 with a GoodSync Pro license.

GoodSync2Go is now available for download at www.goodsync.com.

About Siber Systems:

Founded in 1995, Siber Systems creates and markets software products to consumers and businesses around the world. Our software is highly acclaimed and has received numerous awards including PC Magazine Editor's Choice, CNET's Best Software of the Year, and PC World's 25 Products We Can't Live Without. The company's flagship products, RoboForm and GoodSync, are used by millions of people worldwide, with registered customers in over 100 countries. GoodSync, an easy and reliable automatic file synchronization program, was released in 2006 and already enjoys favorable reviews from users and the press. RoboForm Enterprise has been solving password management problems quickly, easily and cost-effectively since 1999. RoboForm Enterprise reduces employee passwords to one secure, master password and provides an easy and cost-effective way to improve password security while making employees more productive and helping organizations to recognize immediate IT cost savings. As part of the company's strong commitment to customer satisfaction, its software comes with a risk-free trial. Headquartered in Fairfax, Virginia, Siber Systems is privately held.
