

SIBER SYSTEMS' ROBOFORM® PASSWORD MANAGER NOW AVAILABLE FOR WINDOWS PHONE DEVICES

World's #1 Password Manager and Form Filler is Now a Free Windows Phone App

Fairfax, VA - January 28, 2014 - [Siber Systems](#), Inc., maker of [RoboForm](#), the world's most popular [password manager](#), today announced the availability of [RoboForm for Windows Phone](#), a free app that extends the power of RoboForm to smartphones running the Windows Phone operating system. RoboForm for Windows Phone lets users securely log-in to any number of Web accounts, fill in forms with personal information and much more, with a single click, all from their Windows Phone.

Award-winning RoboForm, also available for Windows, Mac, iOS and Android devices, is a powerful password manager that lets users securely log-in to all their important websites including banking, e-Commerce and healthcare sites, as easily as using a browser bookmark. In addition to eliminating the need to remember dozens of usernames and passwords, RoboForm also stores identities, bookmarks, and contacts.

“Recent high-profile hacking events prove that personal information continues to be at very high risk. We believe that everyone should be using secure, unique passwords for all their website logins—and RoboForm can make that goal a reality,” said Bill Carey, Siber Systems VP of Marketing. “RoboForm for Windows Phone brings all that power to your Windows Phone device. With more people logging into their secure sites in public from their mobile devices, it only makes sense to secure their passwords with RoboForm.”

In addition to securely accessing username/password information, RoboForm for Windows Phone lets users create and edit their log-ins, bookmarks and safenotes. Users can also auto-generate different username/passwords for each use; the information is then stored in a RoboForm Everywhere account to be used from the RoboForm for Windows Phone app.

RoboForm Everywhere, the most popular version of RoboForm, allows users to automatically sync their RoboForm data across all their devices including desktop PCs, laptops, smartphones, and tablets. Make a change on one device and the change is reflected on all other units upon which the user has installed RoboForm software.

To download the free RoboForm for Windows Phone app, go to the product's [Windows Phone store](#) app page.

About Siber Systems:

Founded in 1995, Siber Systems creates and markets software products for consumers and businesses around the world. Our software is highly acclaimed and has received numerous awards, including PC Magazine Editor's Choice, CNET's Best Software of the Year, and PC World's 25 Products We Can't Live Without. The company's flagship products, RoboForm and GoodSync, are used by millions of people worldwide, with registered customers in over 100 countries. GoodSync, an easy and reliable automatic [file synchronization](#) program, was released

in 2006 and already enjoys favorable reviews from users and the press. RoboForm Enterprise has been solving [password management](#) problems quickly, easily and cost-effectively since 1999. RoboForm Enterprise reduces employee passwords to one secure, master password and provides an easy and cost-effective way to improve password security while making employees more productive and helping organizations to recognize immediate IT cost savings. As part of the company's strong commitment to customer satisfaction, its software comes with a risk-free trial. Headquartered in Fairfax, Virginia, Siber Systems is privately held.
