**ANNOUNCING SIBER SYSTEMS' ROBOFORM 7:  
UNIFIED PASSWORD SYNCING FOR ALL YOUR DEVICES**

*Major New Release of World's #1 Password Management Application Makes It Easy To  
Coordinate Your Passwords and Identities, No Matter Where or How You Log On*

**FAIRFAX, VA — January 6, 2011 — [Siber Systems](#), Inc.**, a company dedicated to providing world-class computing productivity software for enterprises and individuals, today announced the release of [RoboForm 7](#), a major release of the world's #1 password management application and the solution for a new era in mobile computing. Among its many improvements, RoboForm 7 features the debut of RoboForm Everywhere—a new service that allows users to install RoboForm on unlimited computers and mobile devices and automatically sync their passwords, identities and bookmarks from anywhere, on any browser, device or PC.

RoboForm 7 is the first iteration of the award-winning password manager to support virtually any digital platform. The new version is suitable for:

- **Any browser** including Google Chrome, Safari (Windows) and Opera as well as Internet Explorer and Firefox.
- **Any Windows PC** including desktops, netbooks and laptops.
- **Any mobile device** including iPhones, iPads, iPod Touch, BlackBerrys, Palm devices and all smartphones running Windows Mobile, Symbian or Google's Android OS.

When combined with the RoboForm Everywhere option, RoboForm 7 allows you to not only access your Logins, Identity information, Bookmarks, and Contacts on any device, but to seamlessly synchronize them wherever or whenever you make additions or changes.

“RoboForm 7 reflects the input of our user community, which now extends to 100 countries,” said Bill Carey, Siber Systems VP of Marketing. “We’re proud to take RoboForm to a level that reflects the way people access the Internet for work and play. After more than 10 years as the leading password manager, we’re confident that RoboForm 7 will keep users at the forefront of convenience and security.”

RoboForm conveniently and securely simplifies the process of filling out online forms by storing user information such as name, address, phone number, and other important information required by the user; it also securely stores confidential data such as passwords, bank accounts, and credit card numbers. Each time the user fills out an online form or requires access to his or her personal passwords or logins, RoboForm automatically furnishes the data—all while protecting it from theft or loss.

### **New Look, Features**

In addition to its go-anywhere accessibility, RoboForm 7 offers an updated look that is more attractive, better organized and easier to navigate. Menu files and icons have been revamped and are easier to find; what's more, RoboForm's architecture has been reworked for faster operation.

RoboForm 7 continues to evolve beyond password management and form filling. The latest software version allows users to import and organize their Bookmarks from all browsers. Moreover, users can keep these Bookmarks in sync between multiple computers and devices for easy and convenient access from anywhere.

As part of RoboForm 7, a new AutoSave Information Bar makes it easier to view, capture and store passwords when logging into websites. The Information Bar suggests a login name based on the site name, yet also allows customization when desired. If the user doesn't wish to save password information for a particular site, the "Don't Save/Never for the Site" option eliminates future AutoSave prompts.

Also new is a Group Login feature that lets users login to several websites with a single click. Perfect for people who log into the same password-protected websites each morning, Group Login combines multiple password protocols into a single procedure for simultaneous website access.

### **RoboForm Everywhere Discount**

RoboForm 7 is available to all users for a free 30-day trial—and is free permanently to personal users with 10 logins or less. For those who require more than 10 passwords, RoboForm 7 Pro is available for a one-time purchase price of \$29.95.

RoboForm Pro users will save \$10 on the first year's annual subscription price for RoboForm Everywhere, the cloud-based password syncing service. For just \$9.95, Pro users can load and synchronize all their passwords and other RoboForm data on unlimited computers and mobile devices. To learn more about RoboForm 7 visit [www.roboform.com](http://www.roboform.com).

### ***About Siber Systems:***

*Founded in 1995, Siber Systems creates and markets software products to consumers and businesses around the world. Our software is highly acclaimed and has received numerous awards including PC Magazine Editor's Choice, CNET's Best Software of the Year, and PC World's 25 Products We Can't Live Without. The company's flagship products, RoboForm and GoodSync, are used by millions of people worldwide, with registered customers in over 100 countries. GoodSync, an easy and reliable automatic file synchronization program, was released in 2006 and already enjoys favorable reviews from users and the press. RoboForm Enterprise has been solving password management problems quickly, easily and cost-effectively since 1999. RoboForm Enterprise reduces employee passwords to one secure, master password and provides an easy and cost-effective way to improve password security while making employees more productive and helping organizations to recognize immediate IT cost savings.*

*As part of the company's strong commitment to customer satisfaction, its software comes with a risk-free trial. Headquartered in Fairfax, Virginia, Siber Systems is privately held.*
